

Gustavo Henrique de Jesus da Silva

Summary

Highly skilled Frontend Developer with a strong foundation in Software Engineering and extensive experience building scalable, high-performance web interfaces. Proficient in the JavaScript/TypeScript ecosystem, with deep expertise in React.js, Next.js, and modern state management like Redux. I have a proven track record of translating complex requirements into clean, maintainable code and optimizing applications for maximum speed and accessibility. I am eager to apply my technical precision and collaborative mindset to contribute to the success of the Frontend Development team.

Experience

System Analyst | Mutant | October 2025 – Present - Built and maintained high-quality user interfaces for diverse digital solutions using TypeScript, React, and Redux. - Implemented new features and managed complex application states, ensuring optimal performance and user experience. - Delivered robust frontend components while adhering to high architectural standards and best practices.

Freelance Web Developer | JVJ E-commerce | November 2023 - Developed a fully functional responsive homepage and established a new visual identity for an e-commerce platform. - Utilized jQuery, Bootstrap, and CSS to deliver a high-quality prototype within a tight 48-hour deadline. - Ensured modern design principles and excellent usability for the final project presentation.

Freelance Web Developer | Cadmo SA Dental Clinic | April 2022 – September 2022 - Led the end-to-end development of a comprehensive web system, from planning and design to final implementation. - Developed the frontend using JavaScript and implemented a robust backend and database with PHP and MySQL. - Delivered a scalable solution that fully met the client's operational needs and technical requirements.

Projects

Black Nib - Modern Blog Platform - Developed a full-stack blog platform using React 18, Vite 6, and TanStack Query 5. - Implemented server-side rendering, SEO optimization, and containerization with Docker. - Featured interactive elements like infinite scroll, category organization, and dark/light theme support. - GitHub | Live Demo

CyberNews - Cyberpunk Hacker News Client - Created a retro-futuristic news client with Next.js, TypeScript, and Framer Motion. - Implemented offline support using Service Workers and IndexedDB, and voice commands via Web Speech API. - Designed a keyboard-first navigation system with immersive CRT screen effects and animations. - GitHub | Live Demo

Opala Filmes - Built a real-time movie voting platform using Next.js, Firebase, and TailwindCSS. - Developed an efficient movie management system with watchlist tracking and a 5-star voting system. - Focused on high design fidelity and a responsive user experience across all devices. - GitHub | Live Demo

Doces da Thay - E-commerce Frontend - Developed the frontend for a dessert e-commerce platform using jQuery, Bootstrap, and CSS. - Created a responsive product gallery and an intuitive purchase flow for improved user engagement. - Implemented clean and accessible design principles to ensure cross-device compatibility. - GitHub | Live Demo

Education

- **Bachelor's Degree in Software Engineering** — Jala University | July 2024 – December 2028
- **Intensive English Immersion Program** — CES Dublin, Ireland | 2023
- **Technician in Systems Development** — ETEC de Francisco Morato | 2023

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, PHP, Java, Python.
- **Frameworks & Libraries:** React, Next.js, Vue.js, Angular, Redux, Node.js, Express, Tailwind CSS, Bootstrap, jQuery.
- **Tools & DevOps:** Git, GitHub Actions, Docker, Vite, Webpack, Jest, Firebase, MongoDB, PostgreSQL, MySQL.
- **Methodologies:** Agile, SOLID, DRY, KISS, Responsive Design, W3C Accessibility.

Languages

- **Portuguese:** Native
- **English:** Fluent
